About EWEAS

EWEAS is an ERASMUS+ project which has developed a training programme to provide an essential resource for aquaculture professionals to learn how to benchmark and improve the energy and water efficiency of their aquaculture systems, including potential economic benefits of such improvements.

This will help the sector to meet European and international sustainability targets and improve the long-term economic viability of aquaculture enterprises of all sizes.

Participants who successfully complete the course will receive an e-certificate to demonstrate that they have developed the necessary knowledge and skills to make a significant contribution to their company's energy and water efficiency.

EWEAS e-learning platform content

EWEAS webinar and e-learning platform launch

- International speakers on energy and water efficiency in aquaculture and panel Q+A
- e-learning platform demonstrations in English, Spanish, Latvian, Italian and Slovenian

12th May 2021

register here: <https://eweasproject.eu/webinar>

Seeking beta testers!

Would you like an early view of the EWEAS online course? We would greatly value your feedback and input. Testing in English, Italian and Slovenian will be occurring late April / early May. Email info@eweasproject.eu to register your interest.
